## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- a. Claims 1-2, 7, 9-10, 15, 17-20, 25, 29, 32, 39-40, 45-46, 48-49, 62-63, 65-67, 70-72, 75-76, and are rejected under 35 U.S.C. 102(b) as being anticipated by Cawlfeld et al.

Cawlfeld et al teach an electrolytic cell comprising the elements of claim 1, namely an anode, a cathode and a particulate catalyst material. Caulfield et al further teach an electrolytic cell comprising the elements of claim 9, namely, an anode compartment comprising an anode and a catalyst material, and a cathode comprising a cathode compartment. (See col. 4, lines 34-65, col. 6, lines 5-41 and col. 11, lines 1-50).

The reference does not recite a “reactor” per se, however, the electrochemical cell of the reference is being considered a “reactor” as this structure contains the reagents involved in a reaction. A three-compartment cell is shown to produce chlorine dioxide. (See also example 11).

The reference does not recite “chlorite”, however chlorine dioxide appears to be a product formed by the reference and applicant’s apparatus appears to be similarly configured to prepare the same product.

Art Unit: 1742

Further, statements of intended use are not given weight when determining the patentability of apparatus claims.

As for claim 17, Caulfield et al show a central compartment. See Example 1, col.

12.

The catalytic material of applicant's claim 62 appears to be disclosed at col. 6, lines 15-28 of Caulfield et al.

#### ***Allowable Subject Matter***

2. Claims 36-38, 59-61, 77-81 are allowed.
3. Claims 3-6, 8, 11-14, 16, 21-24, 26, 27-28, 30-31, 33-35, 41-44, 47, 50-57, 64, 68-69, and 73-74 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter:  
The references of record do not show or suggest an electrolytic reactor which comprises an anode, a cathode and a particulate catalyst material supported on ceramic.

#### ***Conclusion***

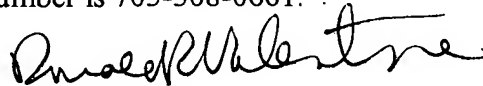

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. White shows an electrolytic cell with particulate catalyst material. Falgen et al show an electrolytic reactor for producing chlorine dioxide.
